

Technical Project Proposal: Automated Data Ingestion Pipeline

Author: Cloud Architecture Core Team | Version: 2.1 | Date: October 2026

Executive Summary:

This proposal outlines the high-throughput architecture for processing multi-format enterprise documents. The solution leverages optical character recognition, NLP entity extraction, and stateful workflow control.

Key Milestones & Estimated Timelines:

Phase 1: Ingestion Gateway & SHA-256 Deduplication (Week 1-2)

Phase 2: Document Classification and Rule Engine (Week 3-4)

Phase 3: Human Review Queue & Audit Logging System (Week 5)
